

Welcome to AP Chemistry!

Over the summer you need to review some basic concepts from the first year course, and given the large amount of material we have to cover this year we don't have much time to do it. Accordingly, you need to do the following problem sets over chapters 1, 2 and 3 over the summer. Please come in at the beginning of the year with these problems **done**. If you have a question, you can call me at home; my number is (973) 691-1666.

Yours,  
Mr. Wallace
